Annual Release 1976 files

Introduction

The annual release of selected official files continues against a background of greater public access through the Freedom of Information Act balanced against the need to protect personal information. The FOI Act (2000) created a new access to information regime and all records were reviewed in accordance with the FOI Act and the Data Protection Act.

Records continue to be brought forward for release as they approach 30 years of age. This involves the referral of the files to the Responsible Authority for sensitivity review. This entails a page by page examination to ensure that a record contains nothing sensitive as defined by the FOI Act and DP Act.

This year's annual release covers the official files with a terminal date of 1976. Of the 607 departmental files examined, 32 were subject to full closure, with an additional 27 subject to partial closure or redaction. Partial closure and redaction (blanking out) are methods to release the bulk of a file and facilitate access by temporarily removing a limited amount of information, the inclusion of which would have resulted in the entire file being closed to the public for an extended period. In the majority of cases, the reason for extended closure was section 40 Personal Information exemption of the FOI Act, which means that personal information cannot be disclosed as it is deemed to be a breach of the Data Protection principles.
