## Introduction

The annual release of selected official files continues against a background of greater public access through the Freedom of Information Act balanced against the need to protect personal information. The FOI Act (2000) created a new access to information regime and all records were reviewed in accordance with both that Act and the Data Protection Act.

Records continue to be brought forward for release as they approach 30 years of age. This involves the referral of the files to the Responsible Authority for sensitivity review. This entails a page by page examination to ensure that a record contains nothing sensitive as defined by the FOI Act and DP Act.

This year's annual release covers official files with a terminal date of 1978. Of the 479 departmental files examined, 20 were subject to full closure, with an additional 57 subject to partial closure or redaction (blanking out). Partial closure involves the removal of a limited number of papers from the file that have been deemed as exempt from the right to know under FOI. To facilitate the release of as much information as possible, redaction can be used to blank out sensitive data within individual documents that would otherwise prevent release. All information withheld under this procedure must conform to the exemptions contained in the FOI Act. In the majority of cases, the reason for extended closure was the application of section 40 – the personal information exemption – of the FOI Act. This means that personal information is exempt from the right to know if it would breach the Data Protection principles.
